

Portable Basketball backstops

The placement of Portable Basketball Backstops on any County owned or maintained highways, roads, bridges, streets or within the road right-of-way is NOT permitted.

While the County fully understands and appreciates the desire to provide an opportunity for children to play outside, promoting play in the street is not encouraged due to the potential hazards and potential damage to County equipment during snow removal operations.

The Department of Public Works will work with the owners to have these basketball hoops removed, and if necessary, have County forces remove them.
