

### Informed Advice

Your friend, MJ, had sexual intercourse with a person they met at a party. Although the two knew it was a risk, they did not use a contraceptive method (birth control method) and they both assumed it was the others first time. A couple weeks go by and MJ starts noticing changes in their body. MJ is concerned and shares this information with you. Please create a dialogue between you and MJ including the following information:

- Symptoms of an STI
- MJ's feelings connected to the situation
- What treatments are available
- Advice on how to avoid the risk of STI

#### Grading Rubric:

REQUIREMENTS	POINTS	EARNED POINTS
Dialogue is realistic and appropriate	/10	
Dialogue includes STI symptoms	/10	
Dialogue includes evidence of MJ's feelings about the situation	/10	
Dialogue includes available STI treatment	/10	
Dialogue includes tips on how to avoid STI	/10
