

Scoring Rubric for Analyzing Influences - MS/HS

INF

<i>Students will analyze the influence of family, peers, culture, media, technology, and other factors on health behavior.</i>	
Accurately identifies both external and internal influences. Effectively explains how external and internal influences interact to impact health choices and behaviors of individuals, families, and communities. The explanation may include both positive and negative influences.	4
Accurately identifies influences and explains how these influences impact health choices and behaviors of individuals, families, and communities. The explanation may distinguish between external and internal influences, but does not clarify how external and internal factors interact to impact health choices and behaviors.	3
Identifies one or more relevant influences, but does not provide an effective explanation of how the influence(s) impact(s) health choices and behaviors of individuals, families, and communities.	2
Does not identify relevant influences, OR offers no explanation, OR the explanation reveals a flawed analysis of the influences' impact on health choices and behaviors of individuals, families, and communities.	1

Goals or Action: _____

Analyzing Influences Score: _____
