

What's Next?

Directions: Read the scenario. Then determine what the individuals in the scenario should do to best support their overall health.

1. **What should this couple do?:** A person has never had sex before. Their partner has, but only once. Do they need to use condoms or dental dams for STI protection?
2. **A couple is about to have sex for the first time. They know they need to use condoms but don't want to be seen buying them in a store. What are two other places they can go to get condoms?**
3. **What should this couple do?:** A couple is having vaginal sex, and the condom breaks. They don't have any more condoms with them.
4. **A person notices small red bumps on the outside of their genitals. They don't look like the slides they saw in science class at school so maybe it's a heat rash. They've had sex before and used condoms a few times. What are THREE THINGS should they do?**
5. **A couple is talking about having sex soon. Both have had sex before with other partners. What should they do prior to having sex?**
