

Recycling

Education & Outreach Programs

The Harford County Office of Recycling offers a variety of education & outreach programs for local schools, businesses & community organizations. Programs are free of charge and must be scheduled in advance.

Recycling Outreach Programs

The engaging presentation takes recycling from the curb to the materials recovery facility and beyond! Harford County's Integrated Solid Waste Management program which includes waste reduction, recycling, composting, waste to energy & landfilling will also be explained. Additionally, program participants will discover how their choices and actions play a critical role in conserving our natural resources and landfill space.

Harford Waste Disposal Center Tours

Bring your students to the Harford Waste Disposal Center for an inside look into the only operating landfill in Harford County. On the tour students will observe daily landfill operations, discover what happens to their recyclables & find out how 700 tons of yard trimmings are recycled into mulch or compost every week. Topics of waste reduction, recycling & environmental stewardship will be discussed in greater detail.

The Office of Recycling is willing to work with groups to present a program that meets the specific needs of your audience or event. Please contact the office for more information or questions regarding our programs.
